

### Step 1: Location Details

Study Location				Study Square (cm)		Yes/No
Name	Date	X_coordinate	Y_coordinate	Length1	Length2	Permanent?
Is there snow on the ground? If so, how deep is it?						

### Step 2: Seed Counts- DONE (no seeds on the ground)

### Step 3: Other Food in the Area

Other available food in the area (record Y/N)			
fungus/mushrooms		pollen	
buds in the trees		fruits or other soft seeds	
buds on other plants		berries	
flowers in trees		other seeds seen in trees	
flowers on other plants		pine cones	
leaves on trees and plants		bird- or wildlife feeder	

### Step 4: Site Description, Notes, and Comments

Do you notice any other types of plants or plant parts that look edible for a squirrel?

Short description of your study area (tree species seen in the area, open or closed canopy, leaves on the trees, type of location (urban/backyard/park/nature preserve, etc.)). Any details you can give about what the area physically looks like:
